About me

Gaming, films, Formula 1, programming

Education

2020 - current	Game programmer HBO bachelor Breda University of Applied Sciences Breda
2016 - 2020	Game Development MBO, niveau 4 Cum Laude SintLucas Eindhoven

Work experiences

2019 - 2020	Intern Game Programmer Mind Mansion Eindhoven

After working in a bigger company in my first internship, I wanted to see how an indie company would fit me. This was a small team focusing on creating simulations to combat common fears and anxieties. Here I coninued improving my C# and Unity skills, but also improved other aspects like design and creativity by working in a small team.

2018 - 2019	Intern Software Engineer Yunify Geleen

Yunify focuses on improving health for emplyees around the world by creating an app for companies to keep their emplyees healthy. Here I improved my Unity, C# and teamworking skills by working in a big team.

2015 - present	Supermarket Employee Jumbo / Emté Sint-Oedenrode

I always aspired to work next to my education to support myself while studying. This gave me dedication and descipline, taught me to value money and time, and gave me the ability to explore the world by roatripping.
